

## LED SCREEN SOLUTIONS

A revolutionary and breakthrough LED solution with high quality and excellent performance.

Flexible solutions, both with HD or Ultra HD video quality to create fantastic imaging landscape via seamless displays.

### CABLELESS LED SCREEN

The Cableless LED Screen is a three-in-one multi-function Rental Display, ideal for renting and transporting, so you can adapt it to different concepts at different venues. It is plug and play, perfect for indoor or outdoor scenarios, and the perfect solution if you're looking for a temporary setup to accommodate your needs.

### HD LED SCREEN

The HD LED Screen is ideal for broadcasters, museums, retail, theatres, corporate or event venues industries. With true HD or Ultra HD video quality, it creates amazing imaging landscape, with a 16:9 golden ratio design, available for FHD/4K/8K by pixel display splicing. Its enclosed design at the back of the cabin makes it totally dustproof, anti-damage and water-proof – which extends the LED's life-span.

### TRANSPARENT LED SCREEN

The Transparent LED Screen has a high transparency rate of 48%. It is ideal for stage events or party venues. It is also a unique transparent screen, made of aluminum alloy cabinet with an excellent and stable heat dissipation, making the display more clear and colorful. It has a standard size of 1000mmx500mm, with front-maintenance support and a weight of 8Kg.
